

Progress Report Sprint 6

- Course Name: CS461 Senior Software Engineering Project I
- Date: 01/13/26
- Team Name: TaxonBodyMassML
- Team ID: CS.032
- Student Names and Emails:
 - Grant Pasquantonio (pasquang@oregonstate.edu)
 - Hailey Prater (praterh@oregonstate.edu)
 - Anish Chowdary Pendurti (pendurta@oregonstate.edu)

Summary - Outcomes, blockers, and insights

- Finished action plan for the UI this term and started work on css styling
- The data combination is complete and has been merged into the main branch.
- One of our blockers was that the previous version of the data combination didn't work due to some software package incompatibilities. As such, we reconfigured our approach.
- We are striving for better communication between our team and with our project partner

Work Log

1. CSS

Status: In-progress

Owner: Hailey

Source Link: [W 2025-11-05-CS.032-Sprint3-ProgressReport.docx](#)

Supporting Artifact: Item.03

2. TaxonBodyMassML Graphic

Status: In-progress

Owner: Hailey

Source Link: [W 2025-11-05-CS.032-Sprint3-ProgressReport.docx](#) (graphic is "styling")

Supporting Artifacts: Item.01 and Item.02

Notes: Want to get approval from project partner before completing the final draft

3. Data Combination

Status: In-progress

Owner: Grant; **Collaborator:** Anish

Source Link: <https://github.com/marknovak/TaxonBodyMassML/pull/3>

Supporting Artifact: Item.04

Notes: Created alternative data combination method, which uses an API taxonomy source

Plan Change: Additional data cleaning is necessary (likely the removal of missing species)

Risk and Quality Tracking

Open Bug Count: 3 (CHANGE IF ANY MORE RISKS/BUGS OPEN UP THIS WEEK)

TOP BUGS	SEVERITY	OWNER(S)	STATUS	LINK	ACTIONS
DATASET TOO LARGE FOR DECISION TREE	High	Grant	In-progress	https://github.com/marknovak/TaxonBodyMassML/tree/random-forest/predictive_models/decision_tree_test.py	Grant will attempt to run the decision tree on the full dataset. However, he will use a smaller size random sample upon each failure.
INTERCONNECTED JS MOVEMENTS	Low	Hailey	In-progress	https://github.com/marknovak/TaxonBodyMassML/blob/main/web_dev/index.js	Hailey will comb through the JS code and remove any movements that solely rely on classes of other elements by the end of Sprint 8
NON-RESPONSIVE CSS	Low	Hailey	In-progress	https://github.com/marknovak/TaxonBodyMassML/blob/main/web_dev/style.css	Hailey will add in CSS that better accommodates smaller screen sizes (media queries) by the end of this term (not a top priority)

Next Sprint Plan

- Continue work on CSS and site styling (including finishing the graphic) to help with UI accessibility and past CSS sprint goals
- Implement a “tutorial” system for users visiting the site for the first time to support usability and accessibility
- Clean the taxonomy dataset either by manually filling missing species or removing them.
- Create a functioning predictive model using a singular decision tree to start. If time allows, begin work on a random forest of XG boosted trees.
- Implement API connection to fuzzy taxonomy matcher as part of the lookup table microservice.

Team Reflection

It felt good coming back from break and working on the project again, but it was a little difficult to find exactly where we left off last term. Looking at the past few sprint documents really helped us and refreshed our memory. After that, we jumped right back into our respective areas of the project. Unfortunately, not everyone could make it to our group meeting on Wednesday of week two, so that posed a little bit of a communication setback.

In the next sprint, we will work harder to meet weekly; this may mean rescheduling our group meetings if someone cannot attend, such was the case this past week. We will be able to see progress on this goal by seeing earlier assignment submissions. Similarly, we would like to make more of an effort to keep our project partner in the loop. This term, we couldn't schedule a meeting until week three, which is pretty late. Even if we don't meet on zoom in a given week, we want to make a goal to give our project partner written updates on slack. We will see progress on this goal by seeing a higher number of messages between us and our project partner on slack.

Artifacts Appendix

Item.01

The mocked-up graphic, made on Canva

Item.02

The rough sketch of the graphic, drawn on Procreate, awaiting go-ahead from project partner

Item.03

Before: 📺 Screencast from 2026-01-18 13-41-14.webm

After: 📺 Screencast from 2026-01-18 13-41-14.webm

Before and after videos of the website CSS styling

Item.04
